PROFESSIONAL PROFILE

Frontend-heavy Full-Stack TypeScript Developer with three years of hands-on experience building React and Next.js applications, including commercial projects and production internship experience. Builds secure Node.js APIs, authentication systems, multi-tenant authorization, SaaS dashboards and durable background workflows. Experienced collaborating with backend teams and delivering responsive, API-integrated products.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, Redux Toolkit, TanStack Query, Framer Motion
Backend & Data: Node.js, Express, REST APIs, MongoDB, Mongoose, Supabase, Zod
Security & Architecture: Authentication, rotating sessions, RBAC, permission middleware, rate limiting, audit logging, background workers
Testing & Tools: Vitest, Jest, Supertest, React Testing Library, Postman, Git, GitHub, GitLab, Vercel, Render

EXPERIENCE

Frontend Developer (Industrial Training) | Raadaa Partners International | *Apr 2024 – Oct 2024*

- Developed and maintained Next.js and TypeScript interfaces for production applications.
- Integrated frontend features with REST APIs, including loading, error-handling and user-feedback states.
- Wrote unit and integration tests with Jest to improve feature reliability and maintainability.
- Collaborated with product and backend teams to deliver features and resolve UI/UX and API-integration issues.
- Worked with Git and GitLab in a collaborative development workflow.

Freelance Frontend / Full-Stack Developer | Independent and Client Projects | *2022 – Present*

- Deken Movers: developed a responsive logistics booking platform for a private client using Next.js, TypeScript and Tailwind CSS.
- Agropaddi Technologies: built landing and e-commerce interfaces and collaborated with backend developers on API integration using Next.js, Redux and GitLab.
- Delivered additional React and Next.js applications across education, media, productivity and commerce, covering authentication, dashboards, CRUD workflows and deployment.

SELECTED ENGINEERING PROJECTS

Aurex | **Full-Stack Business Operations Platform**

Next.js • TypeScript • Node.js • Express • MongoDB • Mongoose • Zod • Vitest • Supertest

Live | **API Status** | **Frontend Code** | **Backend Code**

- Built a multi-tenant business API with workspaces, memberships, system/custom roles and permission middleware protecting business-scoped operations.
- Prevented privilege escalation by restricting users from creating, assigning or approving roles containing permissions they do not possess.
- Implemented short-lived access tokens, rotating refresh sessions, individual session revocation, rate limiting and suspicious-login audit events.
- Developed MongoDB-backed workers using atomic job claiming and persisted retry state for employee bank-account verification and invitation-email delivery.
- Used adaptive email-worker polling with recursive timeouts and jitter, alongside fixed verification polling with per-job exponential retry backoff.
- Added invitation approval, notifications and audit workflows with API tests using Vitest and Supertest; payment execution remains under development.

Animex | **Anime Discovery and Account Platform**

Next.js • React • TypeScript • TanStack Query • Node.js • Express • MongoDB

Live | **Frontend Code** | **Backend Code**

- Combined Jikan API discovery with email verification, Google/GitHub authentication, protected dashboards and profile/session management.
- Implemented cached data fetching, guest watchlists and responsive loading, empty and error states.

Aurela | **Fashion Commerce Experience**

Next.js • React • TypeScript • Tailwind CSS

Live | **Source Code**

- Built a responsive fashion-commerce interface focused on product discovery, editorial presentation, reusable components and polished marketplace interactions.

EDUCATION

Bachelor of Science in Computer Science | Enugu State University, Nigeria | Nov 2022 – Present
