David Okoye

Full-Stack TypeScript Developer | React | Node.js | SaaS Dashboards

Abuja, Nigeria | +234 9163-808-8118 | okoyedav7@gmail.com | okoyedavid.com | github.com/okoyedavid | LinkedIn

PROFESSIONAL SUMMARY

Full-Stack TypeScript Developer with a strong frontend background and growing backend depth, building SaaS-style applications with React/Next.js, Node.js/Express, REST APIs, authentication flows, dashboards, and business workflow systems. Experienced with responsive product UIs, API integration, testing, and production-minded application structure across separate frontend and backend codebases.

CORE SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, dashboard UI
Backend & APIs: Node.js, Express.js, REST APIs, authentication flows, API integration, Postman
Auth & Architecture: JWT/session handling, refresh-token rotation, rate limiting, RBAC/permissions, account settings
Data & State: MongoDB, Mongoose, Supabase, React Query, Redux, Context API
Testing & Quality: Jest, Vitest, React Testing Library, unit and integration testing
Tools & Deployment: Git, GitHub, GitLab, Vercel, Heroku, Vite

EXPERIENCE

Frontend Developer (Industrial Training Internship) | Raadaa Partners International | Apr 2024 - Oct 2024

- Developed and maintained production applications using Next.js and TypeScript as the primary frontend stack.
- Integrated frontend applications with backend REST APIs, improving data flow, error handling, and user feedback.
- Wrote unit and integration tests with Jest to improve reliability and maintainability.
- Collaborated with backend and product teams to implement features, resolve UI/UX issues, and maintain code using Git/GitLab.

Freelance Full-Stack / Frontend Developer | Various Projects | 2022 - Present

- Built client and portfolio applications across SaaS dashboard, productivity, media, education, logistics, and e-commerce use cases.
- Implemented responsive frontend systems with React/Next.js while integrating backend APIs, authentication flows, and deployment workflows.
- Developed production-style project architecture with typed components, reusable modules, API-connected UI, and testable code patterns.

SELECTED PROJECTS

Aurex (In Development): Full-stack SaaS-style business management platform with separate frontend and backend, focused on authentication, business/workspace management, roles, employee records, and payment workflow planning. Tech: React/TypeScript frontend, Node.js/Express backend, REST APIs, JWT/session handling, Paystack workflow planning.

- Built the authentication foundation: forgot/reset password, profile updates, rate limits, login metadata, suspicious-login alerts, and revocable session handling with refresh-token rotation.
- Designing business/workspace flows for team members, system roles, custom roles, employee payment records, and approval-based salary-style payout batches funded through Paystack Balance.

Zentry Task Manager: Full-stack task management application with authentication, CRUD operations, and a responsive TypeScript codebase. Tech: Next.js, TypeScript, MongoDB, REST-style data flows.

- Built task creation and management flows with status/progress tracking and dashboard-style user interactions.
- Implemented full-stack application structure around authentication, database-backed records, reusable UI components, and responsive product UX.

Animex: Anime-focused application showing product UI, routing, API integration, and content discovery workflows. Tech: React/Next.js, TypeScript, Tailwind CSS, REST API integration.

- Built responsive pages and reusable components for browsing, discovery, and detail-style content experiences.
- Integrated frontend data flows with external/application APIs while handling loading states, errors, and responsive product interactions.

EDUCATION

B.Sc. Computer Science | Enugu State University, Nigeria | Nov 2022 - Present
Senior School Certificate (SSCE) | Government Secondary School Pyakasa, Abuja | Oct 2017 - Nov 2020

CERTIFICATIONS

freeCodeCamp Responsive Web Design; freeCodeCamp JavaScript Algorithms and Data Structures; React: Beginner to Pro - Code with Mosh; Ultimate React Course.

ADDITIONAL INFORMATION

- Available for remote full-stack TypeScript, React/Node.js, SaaS dashboard, and product engineering roles.
- Strongest fit: frontend-heavy full-stack roles involving auth, dashboards, API integration, RBAC, and business workflows.
- Comfortable working across separate frontend and backend codebases and documenting product/backend decisions.
